

Fruit MRL Pesticides Profile

AOAC Official Method 2007.01 (QuEChERS method)

The complexity of pesticide, herbicide, and fungicide analysis is increasing with multiple regulations around the world. Additionally, there are unique challenges and concerns with specific matrices and of defensible Limits of Quantitation (LOQ).

Demand for comprehensive pesticide residue analysis for growers, processors and organic certifiers continues to expand as testing requirements for both domestic and export markets increases. Results can be used to satisfy audit requirements for both GLOBALG.A.P., SQF and organic certifications. As you get results on specific residues, we will keep you aware of the acceptable levels of those residues in major global markets.

- Targeted screen developed for tree fruits and berries
- Covers compounds registered domestically for tree fruits and berries
- Satisfies audit requirements for both GLOBALG.A.P. and SQF certifications
- Custom Certificate of Analysis compares results to MRL values from the top 10 global markets

2,6-Dichlorobenzamide	Cyfluthrin	Fenbuconazole	lambda-Cyhalothrin	Rotenone
Abamectin	Cymoxanil	Fenbutatin oxide	Malathion	Saflufenacil
Acetamiprid	Cypermethrin	Fenhexamid	Mefenoxam	Simazine
Acibenzolar-S-methyl	Cyprodinil	Fenpropathrin	Metconazole	Spinetoram
Afidopyropen	Diazinon	Fenpyroximate	Methidathion	Spinosad
Atrazine	Dichlobenil	Flonicamid	Methomyl	Spirodiclofen
Azinphos-methyl	Dichlorvos	Fluazinam	Methoxyfenozide	Spiromesifen
Azoxystrobin	Dicofol	Flubendiamide	Metrafenone	Spirotetramat
Bifenazate	Difenoconazole	Fludioxonil	Myclobutanil	Sulfoxaflor
Bifenthrin	Diflubenzuron	Flumioxazin	Norflurazon	Tebuconazole
Boscalid	Dimethoate	Fluopyram	Novaluron	Tebufenozide
Buprofezin	Diphenylamine	Fluoxastrobin	Oryzalin	Terbacil
Captan	Diuron	Flupyradifurone	Oxamyl	Tetraconazole
Carbaryl	Dodine	Flutianil	Oxydemeton-Methyl	Thiabendazole
Carbendazim	Emamectin Benzoate	Flutriafol	Penthiopyrad	Thiacloprid
Carfentrazone-ethyl	Endosulfan I	Fluxapyroxad	Permethrin	Thiamethoxam
Chlorantraniliprole	Endosulfan II	Formetanate HCl	Phosmet	Thiophanate methyl
Chlorothalonil	Endosulfan sulfate	Hexazinone	Propiconazole	Tolfenpyrad
Chlorpyrifos	Esfenvalerate	Hexythiazox	Prothioconazole	Triadimefon
Clofentezine	Ethoprop	Imazalil	Pyraclostrobin	Trifloxystrobin
Clothianidin	Ethoxyquin	Imidacloprid	Pyrethrin	Triflumizole
Cyantraniliprole	Etoxazole	Indoxacarb	Pyridaben	
Cyclaniliprole	Famoxadone	Iprodione	Pyrimethanil	
Cyflufenamid	Fenarimol	Isfetamid	Pyriproxyfen	
Cyflumetofen	Fenazaquin	Kresoxim-methyl	Quinoxyfen
